## Who we are

We are all former CoCreate - HP employees, each with 20 years of experience with the product line. Indeed no one has more knowledge or experience working with it than we do, since we were the original creators of the product line. We believe in it and want to ensure the customer base has continued access to the original providers of the code. We started our careers designing with CAD, so we understand that people want the tools to adapt to their way of doing things, not vice versa.

We find the Creo Direct/Element tools to be very flexible, highly configurable and customizable. Through years of providing solutions to many customers, we have developed a core foundation of knowledge, skills and reusable code to leverage in most any project. We enjoy talking with customers about their particular experience with the software, and finding ways to help them use the products to much greater advantage.

# CADM products and services

*What we can do for you*

CADM is reaching out to the CoCreate customer base to let you know our business is to keep your systems current and running smoothly

We are past CoCreate employees and specialize in this product line as our sole business.

**Machine designed using Creo Elements/Direct Modeling**

## CADM, Inc

*Providing Solutions for the Creo Elements/Direct product line*

## Our Services

We provide training, consulting, customization and configuration management services for all Creo Elements/Direct products.

- Training:  In addition to PTC offerings, we deliver courses not available thru PTC such as Advanced Surfacing, Integration Kit training, customized courses, and offer video based self-paced training materials.
   We provide on-site expert instructors who have practical experience in the field, and many years of product experience.

- Customization: We build custom extensions to all the products (Modeling, Drafting, Model Manager) to meet your business objectives.  These can range from simple enhancements which accelerate an activity, to complete applications which extend the product's functionality.

- Consulting: We will come on-site and help evaluate where improvements can be made to the process and tools to make them more efficient within your organization.

- Upgrades:  Bring your systems up to the latest versions of the software available and take advantage of the new features to improve your productivity.

- Data Migration and Configuration Management: We specialize in data migration in and out of Model Manager. Also we can configure it to your organization's needs.  This can range from creating rules governing how revisions are managed, to triggering complex actions when key events take place in the product life cycle.

## Customer Connect

### Help us reconnect

With the acquisition of the product line, many customers lost contact or have limited access to knowledgeable resources.

We want to reconnect to customers to let them know we are here to service this product line.

If you are aware of companies having any of these products, please use our web page to help us contact them.  We'll provide a $50 Amazon gift certificate should the contact engage us.  See the web page under About Us for more information.

We would like to get your updated contact information as well, to better interface with you in the future.  Please take a moment to go to About Us on the web site and there is a page to enter your contact information  In a year, we'll hold a drawing from our list for a $400 Amazon gift certificate.
